Efstathiou Electrical Engineering

Electrical Installations

The Technical Company of Electrical and Telecommunication Projects E.ILE was founded by Mr. Efstathiou Georgios, an electrical engineer with many years of experience on the field.

We undertake all kinds of electrical installations, such as buildings, offices, shops, commercial and industrial buildings, theaters and cinemas, hotels, etc. In addition to construction, we also undertake the technical support, supervision and maintenance of our projects.

The real interest in the needs of our customers and the consistency that characterizes us, have led us to the maintenance of a large clientele.

Human resources

A valuable asset for the successful course and development of any business is its human resources. In our company we invest to this asset by providing our employees with a humane and safe working environment.

The staff of our company consists of people with high knowledge, long experience, dynamism and enthusiasm for work.

Due to the constant evolution of the technological field, we cater for the systematic update and training of our staff, which consists of graduate electrical and installation technicians. In all our projects we provide supervision of the works by a Graduate Electrical Engineer as well as a Safety Technician.

Personnel Training

The goal of our company is the continuous training of employees. Respecting the increased demands of the time, we were led to acquire an innovative know-how which we support by attending training seminars. Following the modern safety regulations our technical staff is constantly trained for:

New technologies
and products in the electricity
sector

Audits and certification
in electrical
facilities

Plant safety
and ways to avoid
accidents

Collaborations

E.ILE maintains permanent collaboration with large construction and contractor companies, ensuring through this, a continuous and dynamic development in the field of installation. It is also registered in the Register of Contracting Companies (R.o.C.) for the execution of A' class electromechanical projects. Therefore, we can undertake all kinds of electrical installations in both the private and public sectors.

Electrical and Telecommunication Projects

E.ILE is a technical company operating in the professional field of facility studying, installing and maintaining electrical installations of strong and weak currents. We guarantee high quality and safety in every project we undertake.

Our many years of experience combined with constant updates in the development of our professional field, satisfy the increased demands of every modern project.

Our company has undertaken a wide range of electrical projects specializing in the following areas:
